- SMS and Email Notifications

# How to connect/configure a tracker

## SIM Insertion

- Open cover on tracker
- Insert SIM Card
- Switch on battery (using a small button in tracker)

## Configuring on TrackGaddi

- Create user and vehicle on TrackGaddi
- One time configuration of device on TrackGaddi via SMS

## Device Configuration

- Red wire – battery positive
- Black wire – body earthing
- White/Orange/Green wire – ignition

## Relay Connection

- Yellow wire – used for relay connection
- Relay has 2 green wire. Cut ignition/starter wire and connect both end of cutted wire to 2 green wires
- Relay's white wire will get connected to where Red wire (battery positive) is connected

## Device Range

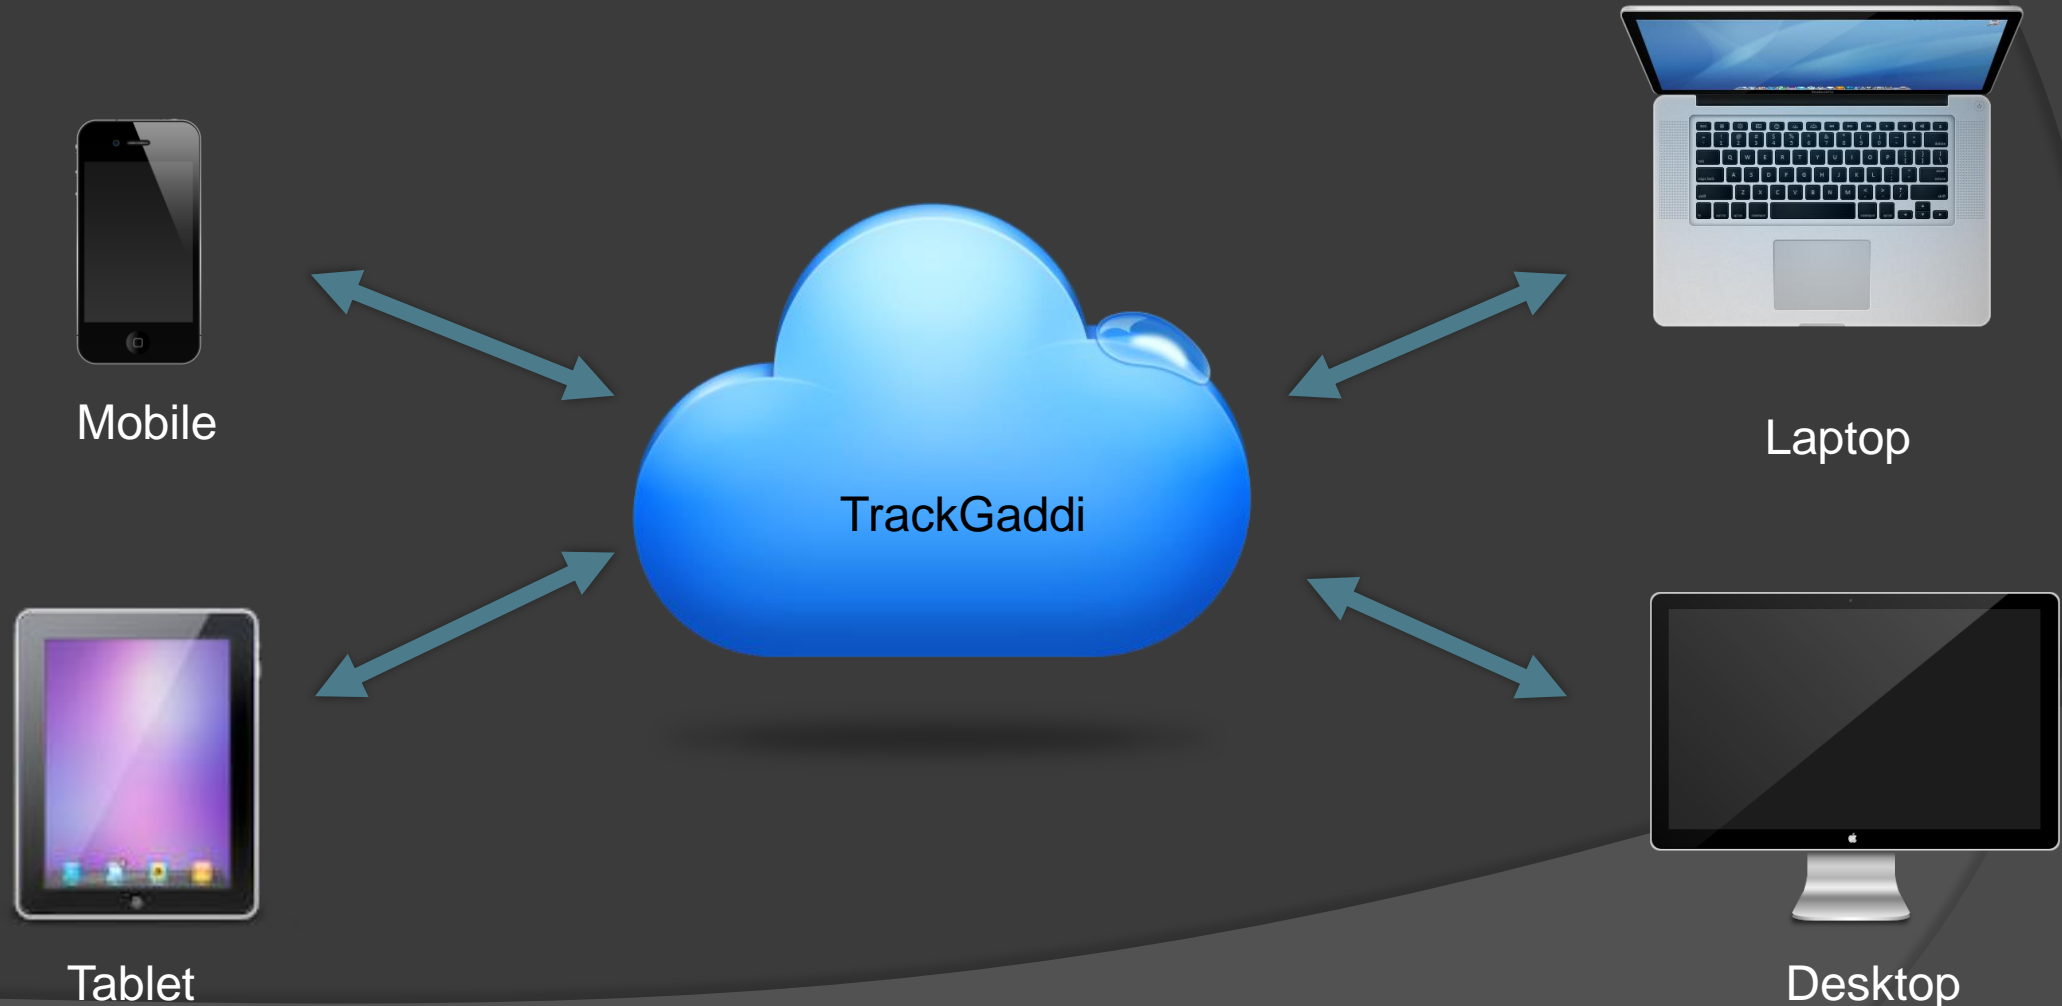

### Recommended Devices

- WeTrack2 (Supports relay) by iConCox
- WeTrack Lite (Doesn't support relay) by iConCox

### Wide range of devices

- TK103, GT06N, GT06F, Maestro, Visiontek, AutoCop and many more
